Description for Online Shops

UP TO 50%* FASTER TO A PERFECT BROWNE TOAST

The AT 2513 is ideal for those who don't like to wait: Thanks to the turbo function, the toast is crispy and perfectly browned within seconds - and 50% faster* than with conventional toasters.

The stylish toaster in a high-quality stainless steel design is not only convincing on the outside, but above all on the inside. Evenly browned XXL sandwich slices are no problem for this toaster thanks to its XXL toasting chambers and bread slice centring.

Light, medium or dark brown? Everyone loves their toast differently browned - the 7 variably adjustable browning levels make it suitable for everyone. Bread or rolls from the previous day can be enjoyed using the warm-up function, the defrost button gently defrosts frozen bread and the release button lets you determine the ideal final time for toasting yourself.

However, the Turbo Toaster not only provides for quick toast in the morning, but also for a cosy family breakfast at the weekend. Thanks to the high-quality and removable stainless steel bread roll attachment, rolls and croissants can not only be prepared, but also served directly. So the Turbo Toaster makes it possible: Fast, perfectly browned and individually adjustable - enjoy your toast just the way you like it.
